International Business Law

Blodgett, Mark S

Summer 2024

This course examines international business law, the law of nations that provides a global framework for doing business. Among topics addressed are sources of international law including custom, principles and treaties; jurisdiction, sales contracts, letters of credit, arbitration, anti-trust, bribery and intellectual property. World Trade Organization and European Union cases are included that address the most current and dynamic global business issues. Students engage in legal research and case analysis as part of a team case presentation.

Real Estate Fundamentals

Chazen, Edward

Fall 2024

This is as an introduction to the real estate industry, looking at it from multiple perspectives. Through lectures, case studies and guests speakers, we will explore the largest asset class in the world. We will learn industry terminology and how leases create property cash flow; how design and market research influences projects; how tenants make leasing decisions; and the role of the public sector and the community in approval and financing - often to advance public purposes - and the tension between the private developer and public sector; we will study affordable, low income and senior housing.

Introduction to Real Estate Law

Cella, Teresa L

Fall 2024

This course is an introduction to commercial real estate law. The course examines the process inherent in real estate transactions from a legal and functional viewpoint. It covers issues relating to acquisitions, dispositions, ownership, financing, and leasing of commercial properties. The course also examines the legal aspects of relationships involved in real estate transactions, including those between buyers and sellers, landlords and tenants, and borrowers and lenders. The course will follow a property acquisition and financing from the letter of intent stage through closing with an emphasis on the most commonly negotiated aspects of a purchase and sale agreement, the due diligence process (including an examination of title, survey, and zoning matters as well as lease review), real estate financing, and closing logistics. Taking a hands-on approach and with expertise shared by guest speakers, students will gain insight into how commercial real estate transactions come together.

Topics: Law and Economics

Wesner, Thomas L

Fall 2024

Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

The State of Affordable Housing in the States

Price, David W

Fall 2024

Course offered for Sophomores only.. How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Real Estate Colloquium

McCullagh, Neil P;Perkins, Taylor A

Fall 2024

Real Estate Colloquium provides an overview of the field of Real Estate. Each session welcomes one or more Real Estate professionals to present on finance, investment, law, planning, and public policy. Real Estate Colloquium will offer insight into diverse topics such as Real Estate Investment Trusts (REITs), capital markets, leasing, brokerage, and development.

Representatives from across the industry will lecture and provide a comprehensive view of the intricate world of Real Estate and the multiple disciplines that contribute to the industry. This course will give students an immersive experience beyond theoretical concepts and a view into the fundamentals of many different topics and career paths. The class meets once per week across the semester, and students must attend seven of fourteen sessions and host at least one session in partnership with a classmate.

Urban Design for Complexity and Sustainability

Littell, Matthew

Fall 2024

The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

Urban Action Lab

Perkins, Taylor A

Fall 2024

Urban Action Lab is a semester long class that provides students with first hand experience within the field of real estate and urban action, working on projects that advance affordable housing and access to opportunity. Students pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies and fellow students. The class will meet once per week and will occasionally require students to attend meetings off-campus.

Real Estate Transactions

Chazen, Edward;Herlihy, Joseph, Esq.

Fall 2024

Real Estate Transactions, is a new course that will examine real estate deals through a practitioner perspective that integrates the business and legal aspects of acquiring land and buildings; designing, developing and constructing buildings; financing and loan workouts; leasing and landlord/tenant rights; managing, operating and selling income property. The course will look at each step of the process in consummating a real estate transaction and the role of various parties - property owner; bank or other lender; investor and buyer of tax credits; tenant; attorneys for different parties; city agency; architect; general contractor and others integral to the success (or failure) of the transaction. The course will be team-taught by a CSOM business and law professor, each with many years of teaching and practical experience negotiating, documenting and closing real estate transactions. The format of the course will include lectures, many case studies, simulations of negotiating transactions and selected guest speakers to supplement the course work with real world experiences. The primary student learning goals are to understand the complexity of business and legal issues in a real estate transaction; how to document key aspects in term sheets, letters of intent and other steps in the process; and, develop sound and effective negotiating skills.

BSLW225001**Community Development & the Evolution of Place-Making****Bennett, Kate****Fall 2024**

What goes into neighborhood transformation? Community Development & the Evolution of Place-Making, immerses students in the multifaceted challenges of community development covering topics such as community mobilization, equity, organizing, sustainable development, and community empowerment. In Community Development & the Evolution of Place-Making, students explore positive social change by engaging with large-scale transformational housing projects. Through lectures, site visits, and case studies, students will see transformational projects and learn from a renowned expert in community transformation. The class emphasizes collaboration, cultural sensitivity, and involving community members in decision-making to ensure the development initiatives are contextually relevant and sustainable. Community Development & the Evolution of Place-Making is a gateway for students to develop knowledge and further explore community development related to community engagement, public policy, and real estate.

Law for the Entrepreneur

Kaiser, Emily Andrea

Fall 2024

An elective built to explore legal questions and challenges faced by entrepreneurs and those supporting the success of entrepreneurs. Structured as an experiential and collaborative course, students will have the opportunity to explore legal issues presented throughout a company lifestyle. Starting with the inception of an idea, students will survey the considerations and processes required for forming an entity, protecting intellectual property, structuring incentive compensation for founders and employees, drafting agreements for service providers, vendors and customers, and preparing for an investment round. With the assistance of guest speakers and evaluation of case studies, students will have the chance to inquire about and access industry-specific considerations. The final project will consist of a mock conversation with interested investors, requiring the delivery of due diligence of the company, a snapshot of the companies pre- and post-round capitalization, and a presentation of the expected use for the financing. Final assessment will place heavy weight on class participation and group work.

Real Estate Development

Chazen, Edward

Spring 2025

This course employs various teaching and learning methods: class lectures; videos of interviews with experts and about illustrative projects; case study discussion; guest lectures; team-based virtual tours of Boston neighborhoods that have been transformed by large-scale real estate development; and, a capstone project of teams preparing a development plan for an actual site in the Boston areas.. This course is focused on what real estate development is and what it means to be a real estate developer. Students will gain an understanding of the process of real estate development, including design and construction; how developers engage with the public sector and the surrounding community to obtain approval for a development; how projects are financed; and, other important elements that contribute to completing successful real estate projects. Also learn about the legal aspects of developments; the ways that development is a catalyst for neighborhood improvement and local economic growth; and, trends in sustainable development.

International Law

Scheufele, Ashly E

Spring 2025

The goal of this course is to provide students with an overview of how international law impacts global commerce. We start the semester by examining how companies do business globally and comparing aspects of foreign legal systems. Next, we work to answer the questions: what is international law, where does it come from, and how does it interact with national law? We study specific topics in international law relevant to global companies, including efforts to establish uniform rules for international contracting, methods for resolving international commercial disputes, cross-border investment protections and trade agreements, and corruption. Finally, we take an in-depth look at real world applications of international legal principles using case studies from around the world. Case topics will range from the legal fallout from industrial disasters to the consequences of bribing foreign officials to the regulation of international sports. By the end of the semester, students will be able to recognize legal problems in the context of global business and will feel comfortable applying appropriate principles of international and national law to move towards a solution. There are no prerequisites.

BSLW115201**Labor and Employment Law****Hendler, Elizabeth S****Spring 2025**

Considerations pertaining to organized labor in society are examined including the process of establishing collective bargaining, representation, and bargaining status under the Railway Labor Act and the National Labor Relations Act. Discussion of leading cases relevant to the legal controls that are applicable to intra-union relationships and the legal limitations on employer and union economic pressures. The law of arbitration, public sector collective bargaining, and employee safety and health law are studied. Topics including laws prohibiting discrimination based on race, color, religion, gender, national origin, age, and disability are examined, as well as the developing law of employee privacy.

BSLW117001**Securities Regulation****Spooner, Rachel S****Spring 2025**

Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statutes. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast-paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in-house counsel at a large bank, to defense counsel with specialties in insider trading and white-collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff case. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.

Topics: Law and Economics

Wesner, Thomas L

Spring 2025

Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

Real Estate Development in Practice

Mcreynolds, Sean

Spring 2025

Real Estate Development in Practice is a focused, one-credit course designed to give students a practical understanding of real estate development. This course delves into the critical stages of development, from site selection and due diligence to project completion, ensuring students grasp the intricacies of bringing a real estate project to fruition. Emphasizing market analysis, the course provides students with exposure to the evaluation of market dynamics, trends, and economic factors that influence development decisions. Financial analysis is a core component, where students see how financial models, cash flow analysis, and investment potential are analyzed. Additionally, the course offers an in-depth exploration of local market knowledge, helping students understand specific regions' unique characteristics and regulatory environment. Real Estate Development in Practice is a gateway for students to develop knowledge and interest in development and is a springboard to other Real Estate Classes.

Real Estate Colloquium II

Perkins, Taylor

Spring 2025

Real Estate Colloquium II - Innovation Field Study provides first-hand experience touring innovative projects, buildings, neighborhoods, and factories that define real estate's future. The course will explore critical debates within the industry by exploring the city and region with leaders and professionals working to change the face of our cities and communities. Students will explore how innovation strives to meet contemporary challenges. Topics will include office-to-residential conversion, retail and revitalization, climate crisis mitigation, modular construction, and infrastructure. This course offers students an immersive experience beyond theoretical concepts and a view into the fundamentals of many different topics and career paths. The course will feature six 3-hour field visits, with each student attending three. Field visits will include an orientation lecture, a group debrief, discussion, and reflection. Students will attend an opening and closing lecture in person at Boston College. They will also be required to submit written reflections after each field visit, and a final paper. The Corcoran Center will provide transportation to each field visit via minibus.

BSLW220801**Urban Action Lab****Frechette, Edward K;McCullagh, Neil P****Spring 2025**

Urban Action Lab is a semester long class that provides students with first hand experience within the field of real estate and urban action, working on projects that advance affordable housing and access to opportunity. Students pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies and fellow students. The class will meet once per week and will occasionally require students to attend meetings off-campus.

Real Estate Field Projects

Chazen, Edward

Spring 2025

Each team will work under the supervision of the Instructor, with weekly team meetings to review the work plan, progress toward identified goals and practicing several presentations that form an important part of the learning experience. There will be three field projects planned. This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students each working on a field project for a real estate/developer investor, not-for-profit organization or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

Real Estate Case Competitions

Pereira, Thomas A

Spring 2025

This course is for students interested in learning how to better prepare for real estate case competitions, with a particular focus on development, finance, and affordable housing. The course will meet weekly for seventy-five minutes to develop skills in the following areas: effectively analyzing a real estate development case, analyzing market conditions, crafting a proposal and slide deck, and preparing for judges' questions. This 10-week course will culminate with students submitting proposals in the Corcoran Center Case Competition, a national real estate competition sponsored by Boston College's Joseph E. Corcoran Center for Real Estate and Urban Action.

Managing for Social Impact and the Public Good

Casas, Jennifer

Spring 2025

Managing for Social Impact is an interdisciplinary course that explores the challenges and opportunities for affecting social change in the public and private sphere. Students will utilize the UN's Sustainable Development Goals (SDGs) as a framework to explore how we can leverage market forces, governmental policies, and philanthropies to better support flourishing human populations. This seminar is the required introductory class for the MSI minor and thus most seats are reserved for those currently enrolled in the minor. Others will be permitted as space allows.

Our Regulated Health Care Industry

Abelman, David

Spring 2025

The U.S Health Care system (or some would argue the lack thereof) often dominates the political, legal, and social policy discussion space. This course is intended to provide a survey-style baseline for educated participation in the discussions and perhaps, ultimately, active participation in the industry solutions going forward. After reviewing the historical context - how did we get here - this course will delve into the current structure of the healthcare services industry and how the legal system has helped shape that structure. Thematically, we will examine equity in access to care, industry efficiency, and quality of care. Across these themes, where has the market failed, and what have legal system players and other market constituents done to address the failures? Topics will include the advent and growth of managed care; provider organization structures; Affordable Care Act and health care reform efforts and concepts; the triple aim of improved patient experience and much more.
